## Professional Summary

Technical specialist QA professional with 12+ years of end-to-end quality engineering experience in enterprise warehouse management, supply chain, and portfolio management. Expert in Manhattan WMS (WMOS) for global clients TFG and Macy's. Proficient in Selenium/Java BDD automation, API testing, and AI-powered testing with GitHub Copilot and Playwright. Skilled in test management, regression testing, and UAT. Hands-on experience with Salesforce and Tableau platforms. Certified Scrum Master (CSM) and Agile AI practitioner with a strong track record of team leadership, automation coverage and delivery excellence.

## Professional Experience

### Technical Specialist

Zensar Technologies, Hyderabad *Aug 2021 – Present*

- Worked as Technical Specialist on Manhattan WMS (WMOS) for TFG and supply chain management for Macy's – covering inbound, outbound, cycle counts, RTV, shipping, and labeling modules.
- Performed functional, end-to-end, integration, regression, smoke, sanity, and UAT testing ensuring quality across complex warehouse operations.
- Developed 70+ automation scripts using Selenium/Java, reducing manual testing effort by 15%.
- Certified Agile AI Engineer with hands-on experience applying AI best practices in Scrum teams, while enhancing my skills using GitHub Copilot and Playwright to enhance development and automation efficiency.
- Designed and implemented scalable automation frameworks using Selenium, TestNG and Cucumber, enabling parallel and cross-browser testing through Selenium Grid.

### Senior QA Engineer

ValueLabs, Hyderabad *Aug 2012 – Aug 2021*

- Delivered Full Stack QA on a portfolio management platform using Selenium/Java with Cucumber BDD framework.
- Automated 200+ test cases achieving 15% reduction in manual test execution effort across the project.
- Integrated automation suites with Jenkins CI/CD pipelines for scheduled and triggered executions, monitoring daily builds with 1,500+ test cases to ensure application stability and achieve a 30% reduction in testing effort.

- Led a cross-functional QA team of 8 engineers across multiple release cycles.

### Trainee QA Engineer

Rofous Software Solutions, Hyderabad *June 2010 – Aug 2012*

- Contributed to quality engineering initiatives as part of the core QA team, delivering functional testing in a fast-paced software services environment.
- Gained knowledge fundamental experiences in testing and quality assurance methodologies.
- Got opportunity to work with Bugzilla and QC tools to report the issues and got complete understanding on the bug life cycle.
- Got best debut award for outstanding performance in the feature validations.

## Skills

- AI & Automation: Customized, subscription-based platforms (Visual Studio Copilot, GitHub Copilot, ChatGPT, LangChain), advanced automation delivery.
- Test Automation Toolset: Selenium WebDriver, Playwright, Eggplant, REST Assured.
- Frameworks: BDD Cucumber, TestNG, Maven, RAG and NLP-driven patterns (used for POC).
- Test Patterns: Page Object Model (POM), modular, data-driven, Regression Testing, UAT, emphasis on reusable patterns for scalability and maintainability.
- Programming (Automation Only): Core Java, Python with AI, SQL, TypeScript.
- DevOps & Process: CI/CD pipelines, Jenkins, Git, Jira, Scrum, Test Management.
- Enterprise Platforms: Salesforce (CRM), Tableau (Analytics).
- Databases (QA context): MySQL, Workbench and SQL Server.

## Education

- M.Tech (C.S.E) / JNTU-Hyderabad / 2013 – 2015 / 76%
- B.Tech (C.S.E) / Gudlavalleru Engineering College, JNTUK / 2005 – 2009 / 63.44%

## Certifications

- CSM – Agile Scrum Master Certification by SCRUM ALLIANCE®
- WMOS Domain Training Certification by RPG Group
- Trained Agile AI Engineer

## Awards & Recognition

- Zensar – Outstanding Team Performance Award 2023
- Zensar – Delivery Excellence Award of the Quarter 2022
- ValueLabs – Best Outstanding Performance Award 2020
- ValueLabs – Star of the Quarterly Award 2016 and 2018
